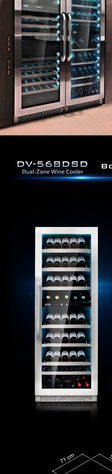
DV5 SERIES
DV-568DSD / Dual-Zone Wine Cooler

DiViN

DV-568DSD
Dual-Zone Wine Cooler



- Designed for storing, serving, and aging wines from different regions by using advanced temperature and humidity control technology.
- Insulated matte black cabinet with seamless stainless steel door frame and streamline aluminum handle.
- Ideal for commercial and residential spaces, both freestanding and built-in capable.
- Triple pane Low-E glass door protects your wines from UV, enhance insulation, and minimize energy consumption and chances of condensation on glass surface.
- Ultra-silent compressor with anti-vibration design to prevent wine from vibrating and going through structural changes.
- Double-deep solid beechwood wine racks are equipped with smooth 3-section ball bearing slides, allowing easy access to wine bottles.
- Beechwood wine racks are compatible with various types of wine, e.g. Bordeaux, Burgundy, Champagne, Rhone, Riesling and those with similar bottle sizes.
- The upper and lower fixed shelves provide wider spaces for bigger bottles, such as Pinot Noir (New World), Champagne, other sparkling wines, and magnum bottles (1.5 L).
- UL and CSA certified.

Ideal for Tropical & Other Climates	Dual-Zone Temperature Control Upper: 5~20°C | Lower: 5~20°C
Triple-Pane Low-E Glass Door	Touch Control Panel
High/Low Temperature Alarm	Icy Blue LED Side Lights
Eco-Friendly R600a Refrigerant	Diverse Wine Storage
Activated Charcoal Filter	Detachable Beechwood Shelves and Display Shelf

Detachable Beechwood Shelves and Display Shelf
The stainless steel trims add a touch of subtle luxury. Displaying your favorite collections or storing opened bottles temporarily on the display rack.

Touch Control Panel
Just a gentle touch to begin multiple settings, including power and LED light on/off, temperature adjustment, and changing from Celsius to Fahrenheit.

Dual Zones With Wide Temperature Range Setting
The upper and lower zones are individually controlled at a range of 5~20°C, which allows flexible temperature settings for storing, serving, and aging different kinds of wine.

Activated Charcoal Filter
Activated charcoal's microporous properties help filtering detrimental substances in the air and preventing odor from affecting the quality of wines.

Concealed Door Hinges
Creates a cleaner look on the door edge and allows for perfect built-in condition.

Double Doors Configuration
Two DV-568DSD can be combined as a double-door wine cooler, which can store up to 332 bottles (standard Bordeaux).

DV-568DSD and DV-589TS can also be combined together to store up to 311 bottles (standard Bordeaux)
